

DECLARATION OF CONFORMITY

This is to confirm that the:
Freezefog Pro Product Code 3001

Manufactured by:

Le Maitre Limited
Fourth Drove,
Fengate
Peterborough
Cambs. PE1 5UR
England

Tel: 0208 646 2222

Conforms with the protection requirements of the Council Directive 89/336/EEC,
relating to Electromagnetic Compatibility, by the application of the following Standards

EN 50 081-1: 1992 Generic Emission Standard

EN 50 082-1: 1992 Generic Immunity Standard

Signed:  on, Date: 1st January 2021

Position: Company Director

On Behalf of: Le Maitre Limited

NOTES RELATING TO IMMUNITY AND CONTINUITY OF PERFORMANCE:

This part of compliance requires a performance criteria level related to continuous or transient form of disturbance.

CONTINUOUS DISTURBANCE -

Criterion A: The apparatus should continue to operate as intended. No degradation of performance is allowed below a performance level specified by the manufacturer.

TRANSIENT DISTURBANCE -

Criterion B: The apparatus should continue to operate as intended after the test. During the test, degradation of performance is, however allowed. No degradation of performance is allowed below a performance level specified by the manufacturer.

Please note that the classification of the disturbance environment has been selected as Class 2, which is deemed to be typical of the environmental usage of Le Maitre product.

Continuous disturbance in Radiated Electromagnetic fields: -

Although user acceptable performance will normally be maintained, certain circumstances may arise which cannot be satisfactorily reproduced in a test environment, where performance degradation may occur. Should this be the case, then the offending 'fields source' should be established and the device repositioned or the 'source' removed or reduced in strength.

Transient Electromagnetic disturbance

At the time of such disturbances, a recoverable performance degradation may occur. Should the level of disturbance be above that which would be associated with the normal operating environment, it is possible that a degradation or loss of performance will ensue.

Le Maitre products do not have a history of immunity related problems either in mobile or fixed installations.
