

The Button introduces new capabilities in a compact & simple form factor. Designed from the ground up to provide an intuitive, capable dmx control solution for special effects equipment of all kinds.

The Button uses a 4 tier menu system for configuration. A flow chart tree is displayed below for reference.

FLAT BUTTON
THE FIRST OF ITS KIND.

RGB LEDs
ENDLESS COLOR POSSIBILITIES.

DMX RANGE
CONTROL ANY STRING OF DMX512.

LIVE ANIMATIONS
REAL TIME INPUT FEEDBACK.

CO2 TIMER
ACCURATE TANK LEVELS.

RGB LEDs

Our new LED design enables custom colors, and provides up to 10x brighter button illumination than previous models.

COLOR PRESETS

The Button has 17 preset colors to choose from, and 1 custom look that can be set via individual RGB 0-255 settings.

DMX RANGE

Use the menu to select a custom starting & ending DMX address, allowing user to control any string of DMX channels, 001-512.

CO2 TIMER

Utilize the integrated timer when triggering products that rely on consumables. The timer feature can also be useful when cues call for a specific duration.

LED RING

The LEDs can act as a rotary meter if desired. The LEDs will work in conjunction with the timer to act as a countdown clock.

SCREEN OPTION

When a timer is not required, user can elect to display a preset word, or disable the screen entirely.

BUTTON BRIGHTNESS

User adjustable. When armed, LEDs will default to 100% brightness and fade in & out, indicating it's armed state.

ADJUSTABLE ANIMATIONS

User can adjust the pulse speed when armed, as well as the active output animation.

INPUT VOLTAGE

85-264v AC via PowerCON True1 input. Suitable for use worldwide.

DMX OUTPUT

Offered in 3 Pin & 5 Pin.

TIER ONE

TIER TWO

TIER THREE

TIER FOUR

USE ROTARY TO CONTROL SYSTEM MENU.

TIP: Quickly return to homepage by turning key to armed position.
